Save Money with a Heat Pump! Make Sure You Maximize Your Savings With All Available Rebates

As the economy continues to concern us, conversations are being had about how to save money on a wide range of topics. From the high prices in your grocery aisles, to planning a staycation rather than a week on a beach to saving money when heating your home, there is no shortage of things to discuss. When the conversations shift to saving money on your home heating bills, often times the conversation turns to the advantages of upgrading to a Heat Pump. While many of us understand that converting our traditional HVAC system to an energy-efficient Heat Pump is a smart move long term, the thought of making the switch (and investment now) may make us pause.

Some people may pause because they don't even know what a heat pump does and can't understand how it can possibly replace BOTH the air conditioner and the heater. While there is a ton of information available, here is a summary:

Instead of burning polluting fossil fuels, heat pumps use electricity and refrigerants to pull heat from outside air, making them more than three times as efficient as fossil fuel furnaces for most of the year. They also work seamlessly in reverse to cool your home.

You can head to the WK Mechanical Website for more information. Below are some useful links:

NYS Clean Heat Program

New York State is encouraging people to make the switch by partnering with utility companies such as Central Hudson, Con Edison, NYSEG, and Orange & Rockland to offer a rebate incentive. As a part of their current Clean Heat Program (www.nyseg.com), residents who convert to clean heat, can receive as much as \$14,000 in rebates depending on the size of your home and the type of system in which you invest. When you partner with WK Mechanical, a NYS Clean Heat Participating Contractor, we work with you through the entire process. Not only do we help you make the best decision regarding the best equipment to install in your home, but we also file the paperwork on your behalf which means you receive the rebate you qualify for **instantly!**

Federal Tax Credit

In addition to the instant rebate from your local utility company, you can apply for a Federal Tax Credit! Beginning January 1 homeowners can receive a tax credit equal to 30% of installation costs for the installation of a qualified heat pump, a maximum of \$2000.

Do It The Right Way With WK!

The Top 10 Reasons You Should Trust WK Mechanical As Your Heating & Cooling Comfort Pros

When your heating or cooling system is not working and you need the help of a HVAC professional, you need to rely on a professional who will evaluate the issue and provide the best solution for your home as quickly as possible. Sometimes it can be difficult to know who to turn to so we've come up with the

top 10 reasons you should turn to WK Mechanical for all your heating & cooling comfort needs.

1. Our **family-owned and operated** HVAC company loves getting to know our customers and building relationships with them. We've been in business in the Hudson Valley for over 30 years and the owners – the Conforti family - are very much involved in the day-to-day business.

2. **When you need us, we are there.** Our phone lines are fully staffed 7 days a week so that when your HVAC systems are down, you can speak to a real live person who will evaluate your issue and make plans to get a highly qualified technician out to your property as soon as possible.

3. **We Do It The Right Way!** Always striving to meet and **exceed all industry standards**, using only the best tool and materials. We have strong relationships with our manufacturers which means, if there are warranty issues, they will back us up to ensure you receive hassle-free service.

4. The entire team here at WK is **trained, knowledgeable and professional**. Everyone is background checked and you can be assured that they will treat your home as if it is their own. All technicians and installers that enter your home will wear a WK uniform and booties.

5. We don't look out for what's easiest and best for our company, **we make sure our customer gets what is best** for their home and family.

6. Whether it is a repair, routine maintenance, or the installation of a new system, **the WK team is easy to talk to**. We care about you and want to be sure your home or business is always comfortable. We take the time with our customers and work to ensure that all your questions are answered before we leave your home.

7. We offer **Free In-Home Consultations** to customize the best system that meets all your comfort needs. We properly size your new home comfort system using Manual J heating and cooling load calculations to ensure your system is designed right for your home.

8. Our extensive **Clean Heat Program** experience allows us to ensure our customers will receive the best investment for their home. We work side by side with our customers to ensure they receive maximum rebates. We file any necessary permits and submit the Clean Program application and complete all rebate paperwork to ensure you receive the maximum rebates available. We will be by your side during the entire Clean Heat Program process.

9. We offer **Free In-Home water testing** to identify water conditions that are causing plumbing issues in your home. Once we determine your water condition, we custom design a chemical-free water treatment system for your home. Also, we provide a service to have your water tested by NYS-certified labs to ensure your water is safe to drink for you and your family.

10. We have over **540 5 Star reviews on Google** alone and many more 5-star reviews from other platforms. We take care of our customers at WK Mechanical!
